WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 140 x 220 mm from 3 mm sheet; round the corners 5 mm.

U-bolt holes: two pairs of 8.5 mm holes, 66 mm apart, centred across the plate, 10 mm in from the top and bottom edges.

Box holes: hold the controller box centred on the plate and drill through its mounting lugs (four 4.5 mm holes).

Fit: the plate's back touches the mast; two 2 in U-bolts go round the mast and through the plate with nyloc nuts; the box screws to the plate's front with M4 screws.

The box sits 3 mm off the mast, its base 1.1 m above the ground.

Check: the plate does not turn on the mast with the nuts tight.

HELIOLITE
